HummBait® Hybrid Spinner

The HummBait's® revolutionary design has proven extremely successful in catching all kinds of gamefish by allowing the use of numerous time-proven fishing presentations all with one lure. You can tip it with a plastic or your favorite bait. Buzz it, or skip it across the surface like a fleeing baitfish. Troll it fast or at the slowest of speeds. Cast & then do an erratic retrieve. Slow roll it through deep water, or vertical jig it and watch it spin on the fall. There is no wrong way to fish a HummBait®!

The pros say presentation speed, as well as the color and size of the lure are all important aspects of successful fishing that you can control. So make sure you have a variety of sizes and colors in your tackle box. To avoid possible line twist use a ball bearing swivel or a beaded chain swivel.

For additional tips from the pros go to www.mackslure.com and remember - there is no wrong way to fish a HummBait®!

- ✓ Allows multiple presentations and is effective on all gamefish.
- ✓ A realistic baitfish silhouette appears as it spins for greater attraction.
- ✓ Each revolution causes bite-enticing vibration and sound.
- ✓ Tail design provides increased snag resistance.
